

This is our first 2 page diorama /model of our school, Immaculate Conception School, in Jamaica Estates, NY.

Please follow these instructions for Assembly:

You will need good quality paper as well as a good pair of scissors and a ruler as well as any object that has a fine edge (perhaps a nail file).

Cut out each of the 4 figures around the outside edges.  
Make sure you cut out the small white slits as well

The bottom most figure on this page has red lines. These are NOT to be cut. They are to be folded backwards (or toward you) using a ruler as a guide. Please crease them using a nail file or other pointed object before you bend it backward.

Page 3 shows the completed Diorama

The following 2 pages contain 2 photos of the completed Diorama.

Please note that I used COVER STOCK paper.

This is a higher quality paper stock (I used this so that the model can stand better - but not so thick that it can't be bent or cut easily)

**SIDE VIEW (where to insert photos):** Order of photos ...first the driveway , then the main entrance, then the lower schoolyard, and finally, the Church

**FRONT VIEW:**
